## PROJECTS

### Portfolio Builder (GitHub Link) 🔗

10/2022 – 04/2023

- Portfolio Builder is a user-friendly web application that lets users create **customized portfolio websites** using **HTML, CSS, JavaScript, SQL, PHP, Firebase, and Bootstrap**.
- It offers a variety of pre-designed templates and allows users to create their own templates from scratch.
- The application includes authentication for **secure login, drag-and-drop functionality, real-time previews, and user-friendly editing tools**. With Portfolio Builder, users can easily create professional-looking portfolios without any coding expertise.

### CryptoNet (Website Link) 🔗

04/2022 – 08/2022

- This project involves the use of **HTML5, CSS3 and JavaScript** programming languages. The main objective of the project is to create a website that serves as a redirect platform for buyers of cryptocurrency.
- The website will direct users to the original website where they can make their **cryptocurrency purchases securely**.
- The project focuses on providing a seamless and convenient user experience by **ensuring smooth redirection to the appropriate cryptocurrency platform**.

## ORGANIZATIONS

### Lets Grow More (GitHub Link) 🔗

Web Development

02/2023 – 03/2023 | Mumbai, India

- During my web development internship at LGM Community, I completed various assigned tasks. I have showcased my work on GitHub, where all the completed tasks are documented and available for review.
- I gained valuable experience and improved my skills while contributing to the development projects assigned by LGM Community.
- Also, I'm working on the Languages **Html, CSS, JavaScript, and ReactJS**.

## ACHIEVEMENTS

### BVEST'21 🔗

Web-O-Code

I'm participating in the Mini Hackathon Contest will there in Online we want to make a **FullStack Website in 15 hours** and that website will be posted in Git Hub with source code to the mentor of Web-O-Code.

### TANTROTSAV 🔗

This was organized in a college event, and I'm **Runner Up** in the entire computer branch in the College event named **Blind Coding** and Language that will be used in **C++**.
